**Quarant'anni di attività nel campo della movimentazione lineare**

Il Gruppo Rollon di Vimercate, specialista nel campo dei sistemi e soluzioni per la movimentazione lineare, compie 40 anni: un anniversario importante, contrassegnato dall'acquisizione, a gennaio, della torinese Tecno Center. Rollon entra in una nuova fase, più matura e ambiziosa, sia in termini di espansione internazionale che di esplorazione di nuovi settori e ambiti applicativi. La Tecno Center, infatti, ha portato in azienda nuovi prodotti ad alto contenuto tecnologico, complementari alla tradizionale gamma di attuatori Rollon, posizionando il Gruppo ai vertici europei per ampiezza dell'offerta nel linear-motion.

**Forty years in the field of linear motion**

The Rollon Group has reached a significant milestone: this year the Vimercate-based company, a specialist in linear motion systems and solutions, celebrates its 40th year of operation. It's an important milestone, marked by the acquisition of Turin-based Techno Center, last January. Rollon is therefore entering a new phase, more mature and ambitious, in terms of international expansion and exploration of new fields and areas of application. Thanks to this acquisition, Rollon's portfolio now comprises new, high technological products which complete Rollon's traditional range of actuators, positioning the group to the top in Europe for the breadth of its linear-motion portfolio.
